# Ultra-Light Bosonic Dark Matter Field

$$\varphi(\mathbf{r}, t) = \frac{\varphi_0}{\sqrt{N}} \sum_n^N \cos(\omega_n t - \mathbf{k}_n \cdot \mathbf{r} + \theta_n)$$

- Quadratic coupling
- Near-zero frequency component

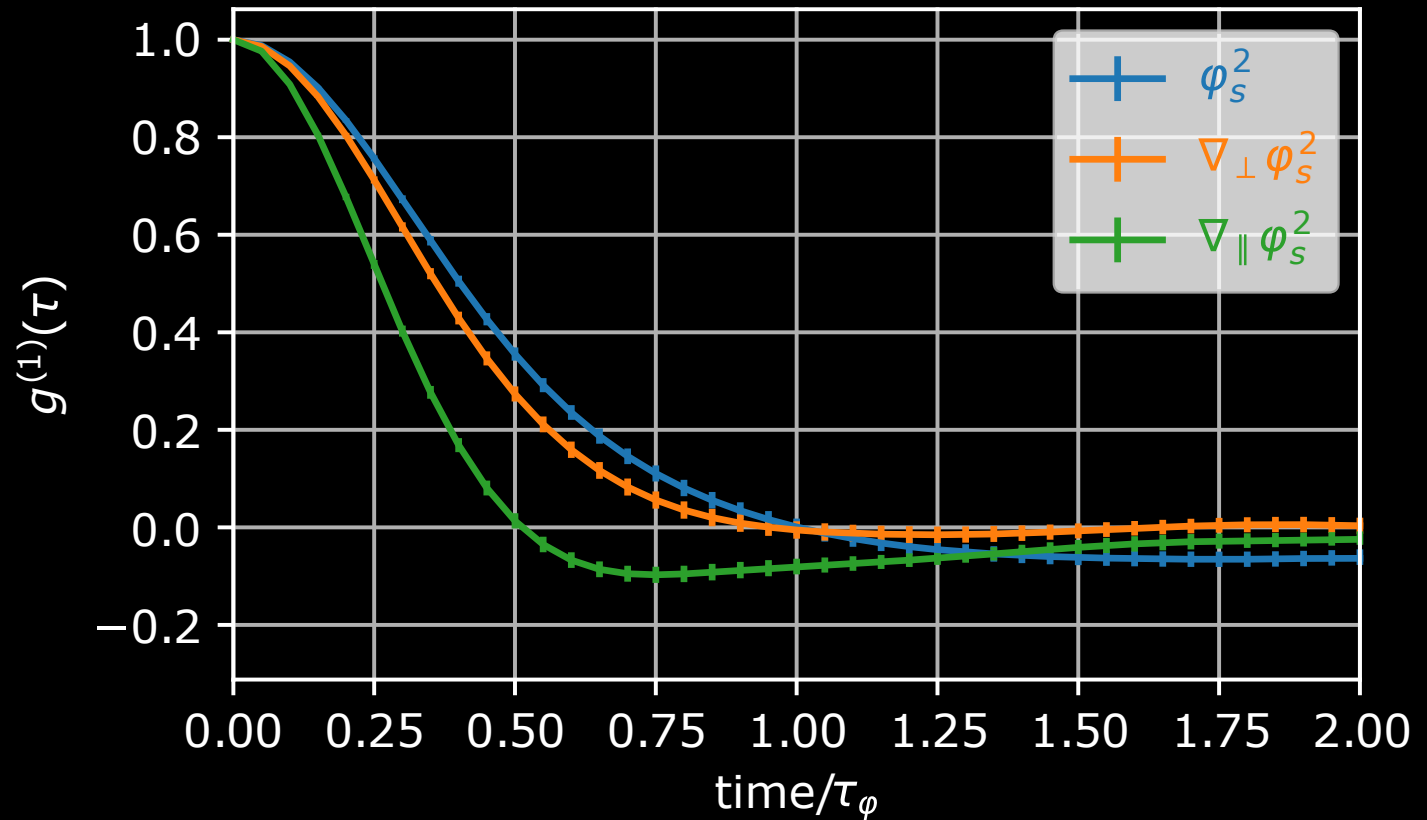

- Interference

# Global Network of Quantum Sensor

- Correlate sensors
- Signature stochastic dark matter background

- Explore beyond cosmological constraints
