

668. WE-Heraeus-Seminar on Baryon Form Factors: Where do we stand?

Monday, 23 April 2018 - Friday, 27 April 2018

Physikzentrum Bad Honnef, Germany

Scientific Programme

668_Program

The scientific programme will start on the 23rd of April (09:00) and will continue until lunch (12:00) on the 27th of April.

The seminar will consist in 8 sessions of 3 hours each. There will be 40 (+10) min and 25 (+5) min talks, the first ones either to discuss specific points, where details are necessary, or general, review talks, to cover many aspects of a subject, while the second ones will be dedicated to specific, important results obtained in theory or experiments. One session will cover methods to be developed as Monte Carlo and web databases. Particular attention will be paid to presentations, views and comments from students and young researchers. Two other sessions will be dedicated to discussions around posters and round tables.

General arrival is planned for 22nd April in the afternoon/evening
