We are pleased to announce that the next Conference of Few-Body Problems in Physics—EFB25—will be held in **Mainz**, Germany, from July 30th through August 4th, 2023. This will be the 25th edition of this conference series which has previously taken place in Guildford (2019), Aarhus (2016), Krakow (2013), Salamanca (2010), and Pisa (2007).

Like the previous conferences, EFB25 will give the possibility to present and discuss recent developments in the field of few-body systems - that is, systems which can be understood in terms of few degrees of freedom.

The conference will focus on recent developments in the field of few-body systems in the following areas:

- Hadron physics
- Nuclei and hypernuclei
- Electroweak processes
- Nuclear astrophysics
- Cold atoms and quantum gases
- Atoms and molecules
- Few-body methods
- Few-body aspects of many-body systems

Host institutions

The EFB25 conference is hosted by the Johannes Gutenberg University Mainz and the Technical University Darmstadt.

Program

We plan to maintain the traditional structure of Few-Body Conferences that last five days, from Monday to Friday, with plenary and parallel sessions. Plenary talks will be selected based on recommendations of the International Advisory Committee. Contributed talks will be selected on the basis of submitted abstracts.
