

Virtual workshop on the "Atomic Structure of Actinides & Related Topics"

Date:
May 26 – 28, 2021

First Circular

In:
zoom

Dear Friends and Colleagues,

Organizers:
Mustapha Laatiaoui
Sebastian Raeder
Miriam Jäger

We would like to draw your attention to the upcoming virtual workshop on the "Atomic Structure of Actinides & Related Topics" and cordially invite you to attend. With this initiative, we would like to offer an event that will bring together scientists from theory and experiment to report on recent advances in the study of actinide atomic structure and related research areas, including but not limited to:

Contact:
actinide_workshop@lists.uni-mainz.de

- Production of the actinides
- Atomic structure theory
- Spectroscopy approaches
- Transport properties
- Nuclear physics
- Nuclear medicine

Please note that due to the Corona pandemic, the workshop will be completely virtual. More information on the event, such as keynote speakers and timetable, is available at the indico page of the workshop: <https://indico.him.uni-mainz.de/event/78/overview>.

We encourage all participants to register on the website as the connection details will be sent to registered participants only. Abstracts should be submitted via <https://indico.him.uni-mainz.de/event/78/abstracts>.

Also, we welcome the opportunity to publish the results and status reports in a topical issue of the MDPI journal "atoms". The deadline for submission is December 31, 2021 (tentative) and we would be happy to include your contribution in this issue. All papers will be subject to peer review. Details for manuscript preparation will be given at a later stage.

We are looking forward to welcoming you in May 2021.

Sincerely,

Mustapha Laatiaoui and Sebastian Raeder
